Gas and Power Fundamentals Outlook: Switzerland

Product Type: Databook ([unknown] pages)	Published by: Datamonitor	Single user price: $645.00
Product Code: DBEN0727	Published on: 12 April 2010	Multi-user price: $1612.50

Datamonitor's Gas and Power Capacity Forecast contains supply and demand outlooks for 32 states (EU27+ Russia, Norway, Croatia, Switzerland and Algeria) to 2030, on a year by year basis to 2015. The forecasts are based upon a regression analysis of demand against economic and demographic trends, combined with a qualitative assessment of regulatory and political drivers.

Scope of this research

- Country specific forecasts of gas and power fundamentals up to 2030, based upon sophisticated econometric analysis and regulatory review
- The power forecast includes a breakdown of the generation mix, according to legislative drivers, existing capacity phase out & planned new generation
- The gas forecast contains a summary of supply sources, based upon historical trade patterns, projected output and new pipelines
- The gas forecast also contains a projection of the states' gas production to 2030

Research and analysis highlights

Switzerland faces a period of heightened reliance on electricity imports between 2012 2020 when nuclear capacity will be reduced

Switzerland relies on hydro-electric generation for 50% of its supply and nuclear power for another 40%, though this figure varies with seasons

Key reasons to purchase this research

- Use this forecast as a reference tool for estimating future demand, supply, generation mix and capacity constraints in gas and power across Europe
- Identify growth markets and opportunities for investment according to states' long term fundamentals outlook and states' individual energy policies
